## About the Contributors

---

HANNE ALBRECHTSEN is a Consultant in the Royal School of Library and Information Science in Denmark. She is President of the International Society for Knowledge Organization (ISKO). Ms. Albrechtsen's interests are support and education within information technology, society, and libraries; cultural aspects of information systems and networks; system design and knowledge organization; information science, and science and technology studies; new challenges for the information profession including international collaboration. Her recent publications include "Database 2001: Design af en multimedie Web katalog i Ballerup Bibliotekerne" (Danmarks Biblioteksskole, 1997, 67 p.) [In Danish: Database 2001—the Design of a Multimedia Web catalogue in Ballerup Public Library]; *Public Libraries and the Information Society* edited with Jens Thorhauge, Gitte Larsen og Hans-Peter Thun—Luxembourg: Office for Official Publications of the European Communities (1997).

GEOFFREY C. BOWKER is Associate Professor in the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign. His book, *Science on the Run: Information Management and Industrial Science at Schlumberger, 1920-1940*, is available from MIT Press. He has just completed, with Leigh Star, a book on the history and sociology of medical classifications (*Sorting Things Out: Classification and Practice*—to be published by MIT Press in September 1999) and has recently co-edited a volume on Computer Support Cooperative Work (*Social Science, Technical Systems and Cooperative Work: Beyond the Great Divide* (LEA Press, 1997).

MARY L. GILLASPY is the manager of The Learning Center, a consumer health information resource at the University of Texas, M.D. Anderson Cancer Center, Houston, Texas. She was formerly the librarian at the AIDS Resource Center in Dallas, Texas, and has a particular interest in HIV disease in women.

JEFFREY T. HUBER holds dual appointments in the Informatics Center at Vanderbilt University Medical Center, Nashville, Tennessee: Research Information Scientist in the Active Digital Library, Eskind Biomedical Library, and Research Assistant Professor in the Division of Biomedical Informatics, School of Medicine. He specializes in HIV/AIDS and contributes regularly to the body of knowledge concerning the disease.

ELIN K. JACOB is an Associate Professor in the School of Library and Information Science at Indiana University in Bloomington, Indiana, where she teaches in the area of knowledge organization and representation. Her research, which adopts a neopragmatic, poststructuralist approach to formal systems of organization, focuses on the sociocognitive nature of categorization; on the linguistic and cultural origins of classification structures; and on the process of knowledge potentiation and the development of organizational tools that will extend current capabilities through the implementation of flexible representational frameworks.

HOPE A. OLSON is Associate Professor and Graduate Coordinator at the School of Library and Information Studies, University of Alberta, where she teaches organization of information including cataloging and classification, feminism, and library and information studies and globalization and diversity issues. Ms. Olson's research is on subject access in library catalogs and uses post-structural and other critical theoretical stances. She has published articles on classification and subject headings, on deconstruction as a methodology, and on teaching cataloging.

MARK A. SPASSER is Informatics Coordinator at the Center for Botanical Informatics, L.L.C. at the Missouri Botanical Garden in St. Louis, Missouri. Mr. Spasser's recent publications include: "The Enacted Fate of Undiscovered Public Knowledge" (*Journal of the American Society for Information Science*, 48[8], 707-717, 1997), "Mapping the Terrain of Pharmacy" (*Scientometrics*, 39[1], 77-97, 1997), and "Managing Cognitive Overload in the Flora of North America Project" (with Kay L. Tomlinson, J. Alfredo Sanchez, and John L. Schnase) (Proceedings of the Thirty-First Annual Hawaii International Conference on System Sciences, 1998).

SUSAN LEIGH STAR is Professor at the Graduate School of Library and Information Science, University of Illinois at Urbana-Champaign. Her research is in the area of social aspects of computing, information science, and technology. She is the author of *Regions of the Mind: Brain Research and the Quest for Scientific Certainty* (Stanford, 1989) and, with Geoffrey Bowker, of *Sorting Things Out: Classification and Practice*, to be published by MIT Press in September 1999. She is the editor of *Ecologies of Knowledge: Work and Politics in Science and Technology* (SUNY 1995) and *The Cultures of*

*Computing* (Blackwell, 1995). Professor Star teaches classes in social informatics, writing, qualitative methods, and race and gender issues in information science. She was a student of both Anselm Strauss and Barney Glaser during her doctoral studies at the University of California in San Francisco.

JENNIFER TOBIAS is an Associate Librarian in the Reference Department at the Museum of Modern Art Library in New York.
